Education for Social Change

Azim Premji University was established in Bangalore in 2010 with the vision to contribute to the realisation of a just, equitable, humane and sustainable society. The Azim Premji Foundation set up the University as a fully philanthropic, not for profit entity with a clear social purpose.

The availability of trained professionals in education, development and allied social sectors in India is grossly inadequate, given the scale, complexity of issues and the wide range of competencies required to work in these areas. Azim Premji University's key mission is to address this significant talent gap and prepare competent, motivated and socially committed graduates capable of contributing to a just, equitable, humane and sustainable society.
